MD Tanvir Islam

COMPUTER VISION RESEARCHER · FULL-STACK DEVELOPER

tanvirislam.cqu@gmail.com Google Scholar ORCID ResearchGate GitHub LinkedIn

PROFILE

I'm a computer vision researcher focused on Medical Image Analysis. As a master's researcher at Chongqing University, I developed deep-learning methods for skin lesion segmentation and classification. Currently, I work as a full-stack developer at KI-Quadrat, building AI-integrated web applications.

Research interests: Medical AI · Medical Image Analysis · Medical Foundation Models

EXPERIENCE

Full-Stack Web Developer Feb 2026 – Present
KI-Quadrat Systemhaus GmbH · Remote · HQ Austria
Leading full-stack development of an AI-powered web application (Next.js, React, TypeScript) and contributing to its RAG system.

Web Developer Intern Oct 2025 – Jan 2026
KI-Quadrat Systemhaus GmbH · Remote · HQ Austria
Full-stack work with Next.js, Node.js, Convex and PostgreSQL on the core product.

MSc Researcher – Deep Learning & Medical Image Analysis Sep 2022 – Sep 2025
Chongqing University · Supervisor: Assoc. Prof. Yunfei Yin
Developed MRLSA-Net for skin lesion segmentation and a DermoGrabcut-based classification pipeline; evaluated across ISIC-2018, PH2 and HAM10000.

EDUCATION

Master of Engineering, Computer Science and Technology 2022 – 2025
Chongqing University · Chongqing, China
Thesis: Research on Classification and Segmentation of Skin Lesion Images Based on Deep Learning

Bachelor of Science, Computer Science and Technology 2017 – 2021
Jiangxi Normal University · Jiangxi, China
Thesis: Role-Based Access Control in E-Commerce Web Application

RESEARCH & TECHNICAL SKILLS

Research / ML: Deep Learning, CNNs, Image Segmentation, Image Classification, Attention Mechanisms, PyTorch, TensorFlow, OpenCV, RAG Systems, LaTeX

Engineering: Python, TypeScript, JavaScript, Java, C++, React, Next.js, TanStack Start, Astro, Node.js, Tailwind CSS, PostgreSQL, Convex, MongoDB

Languages: Bengali (native) · English (professional) · Mandarin (conversational) · Hindi (proficient)

PROJECTS

MRLSA-Net (Research code) – Official PyTorch implementation of MRLSA-Net, a U-shaped encoder–decoder with multi-scale feature gating and local self-attention for skin lesion segmentation. github.com/M-Tanvir-Islam/MRLSA-Net

KrishiDoc (Ongoing · Hobby project) – A lightweight image classifier for paddy diseases, aimed at farmers in Bangladesh. Current work studies why strong in-dataset scores drop on real field photographs. github.com/M-Tanvir-Islam/paddy-disease-detection-ml

Online Book Shop (Bachelor's thesis) – A MERN e-commerce prototype exploring role-based access control across the API and the interface, with JWT auth and refresh-token cookies. github.com/M-Tanvir-Islam/WebApp-Online-Book-shop

HONORS & AWARDS

- Chongqing University Presidential Scholarship – Three consecutive years · 2022–2025
- Jiangxi Provincial Government Scholarship – Four consecutive years · 2017–2021
- Outstanding International Student Leader – Chongqing University · 2024–2025
- First Prize, International Student Calligraphy, Painting & Photography Competition – Chongqing University · 2024
